

What is...

- Green Cleaning,
- Sustainability,
- And Bio-Based Products?

Green Cleaning is defined as the use of products and services that reduce the health and environmental impact compared to similar products and services used for the same purpose.

Sustainability is defined as products and procedures that will maintain human health, the environment, and facilities for future purpose.

Bio-based Products can be defined as products that are commercial or industrial whose main ingredients are renewable plant or animal materials.

- Access to government financial incentives.
- Improves air and water quality.
- Reduces solid waste.
- Conserves natural resources.
- Decreases greenhouse gasses.

What Can Licking/Knox Goodwill Do For Your Business?

- Lead your organization through the process of going "green" whether it is beginning steps as in "Green," improving by going "greener" or by implementing a sustainability program to the fullest level to "greenest."
- Provide support to your organization in any capacity that is needed; whether it is to supply green products, equipment or service; to helping set up a "Green" pilot program, or to determine what stage of the Green Process you are ready to take.
- Offer proven means to keep your "Green" program costs within your agencies goals and budget by recommending products and processes that are equal to or less than your current costs.
- We are available not only for "Green" program information and services, but also for carpet and hard surface care, water and fire restoration, emergency clean-up, and traditional janitorial work.

State and federal government has been setting the stage for using "green products" for several years. Bio-based products are the preferred chemical choice as mandated.

Senate Bill 131 requires the Director of the Department of Administrative Services (DAS), to establish a program ensuring that supplies composed of bio-based products are purchased by DAS, state agencies, state institutions un-political subdivisions of higher education SBI31 became effective on November 22, 2010.

The Federal Executive Order 13101 mandates 95% of new contract actions, including task and deliver orders, for products and services with the exception of acquisition of weapon systems, meet the requirement for use of sustainable environmental practices.

Licking/Knox Goodwill Industries, Inc., has taken the initiative to provide the best of services to its customers by providing basic green chemicals, and prices to start your sustainable program.

Now, it's up to you to decide what level of green you need or want to be, let Goodwill help you decide and lead you through the process. You may want to meet LEED Certification (Leadership in Energy and Environmental Design) or simply enjoy your Green Program. Whatever level of green you can envision, Goodwill can provide the knowledge, education, and experience to help you grow from green to greenest.

Green Committee Mission

To become experts in providing environmentally sound services and products through research and data in order to implement "Green" practices.
